Question: **Comments:**

Response Rate: **14.29**% (**1** of **7**)

1 I assume we (students) are supposed to learn the given subject matter for the week in lecture and then utilize the lab and simulation program to make sense and understand what we heard in lecture. I wish it worked that way, but because the lecture was lacking I feel it never correlated to the labs...unfortunately! ""

Faculty: **Davis, Benjamin**
Question: **Comments:**
Response Rate: **44.44**% (**4** of **9**)

1 It seems like the voyager program is a crutch rather than a learning tool. While very cool, visually, and somewhat good to help you learn about things like definitions of physical and relational aspects of heavenly bodies, it just seems like a bunch of busy work, and learning a complex user interface for a program that I will never use again. That's my biggest peeve in the course. Also, if something is miscalculated, of course it will be marked wrong, but anything that has any tie to that answer later in the section will also be wrong, which can drop the grade I receive very quickly, from simply doing something wrong early on in the section.

Other than that, you do a great job as a teacher, you explain everything clearly and help me when I am stuck. I know that this is probably one of the easiest courses to teach, but I can definitely tell that you have a deep understanding of everything (on this level at least) relating to astronomy.

2 The lab book is overpriced and hardly worth it. The labs would have been more useful along with the lecture if the topics discussed in each coincided with each other.

3 Ben did a great job of answering the questions we had during the lab. The quizzes he gave didn't try to trick us and he was always able to help us with Voyager. Overall very articulate and helpful.

4 Ben Davis is one of the most understanding and helpful teachers I have had the pleasure of learning under throughout my educational career. Always willing to help no matter how many times you ask for aid, Mr. Davis will assist any student. He genuinely cares about the academic success for his students.

Response Rate: **42.86**% (**3** of **7**)

1 I didn't care for the change in lab assignments during the last lab. "All semester we've been using the same program and method. "Then on the last day we switch to something completely different. "It was not well explained and very confusing. "There was not much explanation of the class. "Each day we were kind of on our own, Ben was available to answer questions, but it was a figure it out kind of lab. "

2 Having a word bank on the quizzes would have helped a lot. Also maybe review for the next quizzes at the end of each class."

3 Nice guy. No complaints.

Response Rate: **11.11**% (**1** of **9**)

1

This has been my least favorite course that I have taken at the University of Arkansas, and it has nothing to do with the instructor. My instructor was clear, intelligent, and always willing to help. The only thing I have to say to him is this: give us word banks on your quizzes.

The course was bad because the work we had to do was menial, trivial, tedious, boring, poorly made, and slow. The work our lab books had us do did nothing to make me interested in our subject matter. In fact, my considerable interest in astronomy has been reduced by the awful coursework. The Voyager program works well, and it allows us to see things that would be otherwise impossible, but the lab book made us spend hours every week copying down numbers from charts, doing overly tedious equations, and scratching our heads at the poorly worded instructions. Every week I dreaded coming to this class, sitting in the uncomfortable chairs, and laboring over the most pointless things.

That I liked the professor but hated the class is a testament to how poor the labwork really was. I hated this class. I felt like it sucked the life out of me. And I would never encourage anyone to take it.

Question: **Comments:**

Response Rate: **42.86**% (**3** of **7**)

1 The class is great just wish we were given more instruction on the lab material, but when you as he is able to help with what you need.

2 labs are more about using the computer than astronomy at times.

3 the instructor knows the material and is able to help when needed.

Question: **Comments:**

Response Rate: **30.00**% (**3** of **10**)

1 I can't see how any teacher can get away with not rounding a student's grade when literally a whole grade point depends on <.5%. That just doesn't seem fair to me that I can get a 70 and a 79.7 and it still count as a 2.0 towards my GPA as opposed to a 2.9. It just doesn't make any sense that you can get robbed from getting in state with a 2.75 with grades that deserve to be there. Such as high Cs that could have been B's but because you don't round I lose a whole grade point.

2 I really enjoyed the night labs."

3 More explanation for the assignments would be helpful- the book isn't very clear. The last lab using the observation packet is a waste of time, it has nothing to do with what we had been previously doing and more frustrating because of it. That really needs to be re-evaulated.

Question: **Comments:**

Response Rate: **22.22**% (**2** of **9**)

1 We need additional time to complete the labs, so as not to be rushed and to be able to understand the material more clearly.

2 This professor not only displays accurate knowledge of the topics at hand, but also works closely with we students on an individual basis. I know for a fact that my grade is that much better thanks to this professor's precise guiding hand. I will recommend this professor to anyone seeking a broader and deeper experience in the subject area this professor specializes in.

Question: **Comments:**

Response Rate: **12.50**% (**1** of **8**)

1 I really liked my teacher, but the course itself was pretty frustrating! I realize the technology in this course is needed to be able to understand the material, but It was so frustrating every week because I was not aware of this program and had a difficult time performing tasks and getting my work done because I did not understand the program very well. I felt like every week I was rushing to get done with the excercises which made me at the end just write down whatever just so I could turn it in for a grade. I fell behind every week, and seemed to always have to rush to get my work done. If you know the program you can finish smoothly however, if you do not, you are in a tough spot. The instructor is willing to help, but with 25 students in the class all encountering questions, he can only do so much. I suggest there be more than 1 instructor in the room. Or atleast the instructor needs a helper, that can assist with all of the questions regarding the program. Most of the time it was, "why isn't this button working" or "which tab do we choose to get to this screen." Yes, these answers are all within your book, but reading page after page to find them really lessens the time you have to spend on actually finishing the work. In order to get the right answers, you have to make sure everything is 100% accurate and that you followed each step in order to make sure your computer screen is correct, so if you miss a step you will most of the time get the wrong answer, and then have to do each step again. It's exhausting and very frustrating. I was so stressed, and I did not feel I was able to learn all that I could because my only goal was to finish the assignment, so I wasn't focused on taking in the information and actually learning it.

1 Greatest lab I have ever had, as well as greatest lab instructor

2 You were an excellent teacher! You always answered my questions clearly! I have no complaints.

Question: **Comments:**

Response Rate: **20.00**% (**1** of **5**)

1 Benjamin Davis was a good lab instructor, he was always able to answer any question that we had. Always prompt and had a good attitude. The class always seemed rushed, and we were trying to do too much in a short amount of time. The instructor was great however and was a good teacher.
